Protect Liquidity

What is?

Projects can lock these liquidity tokens by sending them into a time-released vault

Market confidence & Rug-pulls

Remove the risk of liquidity being pulled all at once by project owners & ensure liquidity for market participants

Reduce Sell Pressure

What is?

Projects can lock a percentage of their pre-mined token supply or team owned tokens

Investors Confidence & Exit Scams

Community and investors can be reassured that tokens will not be mass dumped by the team during the contract period

Incentivize Behaviour

What is?

Vesting tokens over time can be used as a strategy to incentivize market behaviour and avoid mass token dumps

Volatility & Mass Dumps

Creating a more balanced and spread division of token releases reduces sell pressure, mass dumping and volatility

Core Business Focus

What is?

The service allows projects to save time developing custom solutions.

Save Development Time

Projects can pay to use our audited contracts and safely and efficiently offer this service to their communities without development effort required.
